

Hancock Street Area Sewer Separation Project

Date: Friday, June 24, 2005

Type of Work: Sanitary Sewer and Storm Drain Construction

Location: Work is currently underway on Fern Street between State and Garland Streets and State Street between Fern and Birch Streets.

Schedule: Work will be underway through July 1st on Fern Street between State and Garland Streets. House Service lateral connections should be complete by the Wednesday, June 29th. Temporary pavement on Fern Street will be done on Thursday, June 30th or Friday, July 1st. Roadway pavement reclamation and paving will be done four to six weeks after the completion of all underground pipe work. Loaming and seeding and hand paving will follow. Temporary pavement will be placed on all excavated areas until roadway pavement reclamation has begun. Work is also underway on State Street between Fern and Birch Streets. This work consists of house service lateral and catch basin installations. This area will also be paved on June 30th or July 1st also. The Contractor will begin laying sewer and storm drain mains on Birch Street at State Street on Wednesday, June 29th.

Detour Route: Fern Street is open to local traffic during daylight hours and through traffic during night time hours. Most driveways are accessible during the day. Outbound traffic (towards EMMC) is currently being detoured to Hancock Street via Birch Street. Inbound traffic is on State Street with no detours.

Comments: **Trench pavement reclamation** means the pavement on a trench where sewer and storm drains will be laid is ground up by machine in preparation for the installation of sanitary sewer and storm drain pipes. **Roadway pavement reclamation** is the grinding and grading of the pavement across the full width of the street in preparation for paving after all underground pipe work has been completed.

Because of the complexities of the work, work areas, schedules, and detour routes may change without notice. We will do our best to keep information up to date. If you have a question about a specific work location, schedule or detour, please call Mark Ward at 992-4252 or Tim Smith at 745 – 7286.
